Powering the creativity of the future

AlmaLinux Day: LA

benny Vasquez, Chair, AlmaLinux OS Foundation

July 18, 2026

The next 30 minutes

- 1 Where the ground went
- 2 The year since Vancouver
- 3 AlmaLinux by the numbers
- 4 Why we built for studios
- 5 Your day ahead

The ground keeps shifting.

The choice is not optional anymore:
VFX Reference Platform moves to EL9 in CY2027.
X.org is gone from EL10.

Since Vancouver...

Boring. Predictable. On time.

~1 week after RHEL, every time.

What shipped for the pipeline

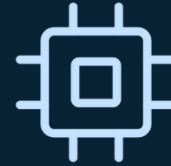

Native NVIDIA

9 & 10

Btrfs

10.1

x86-64-v2

older nodes

i686 userspace

10.2

CRB by default

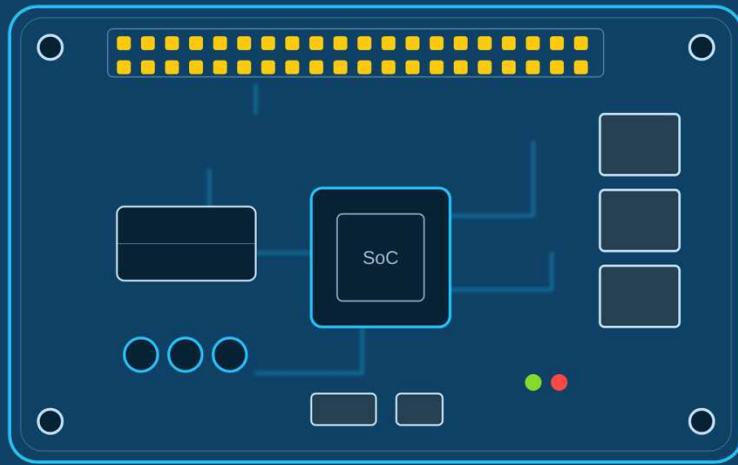

10.0

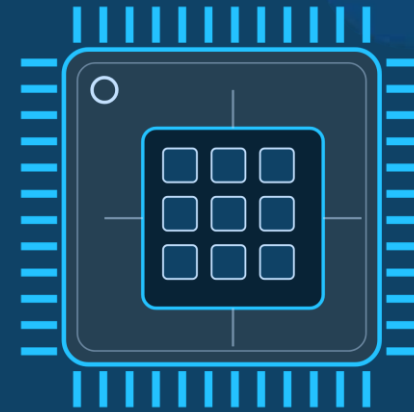

150+ devices

re-enabled

The base goes where the edge is.

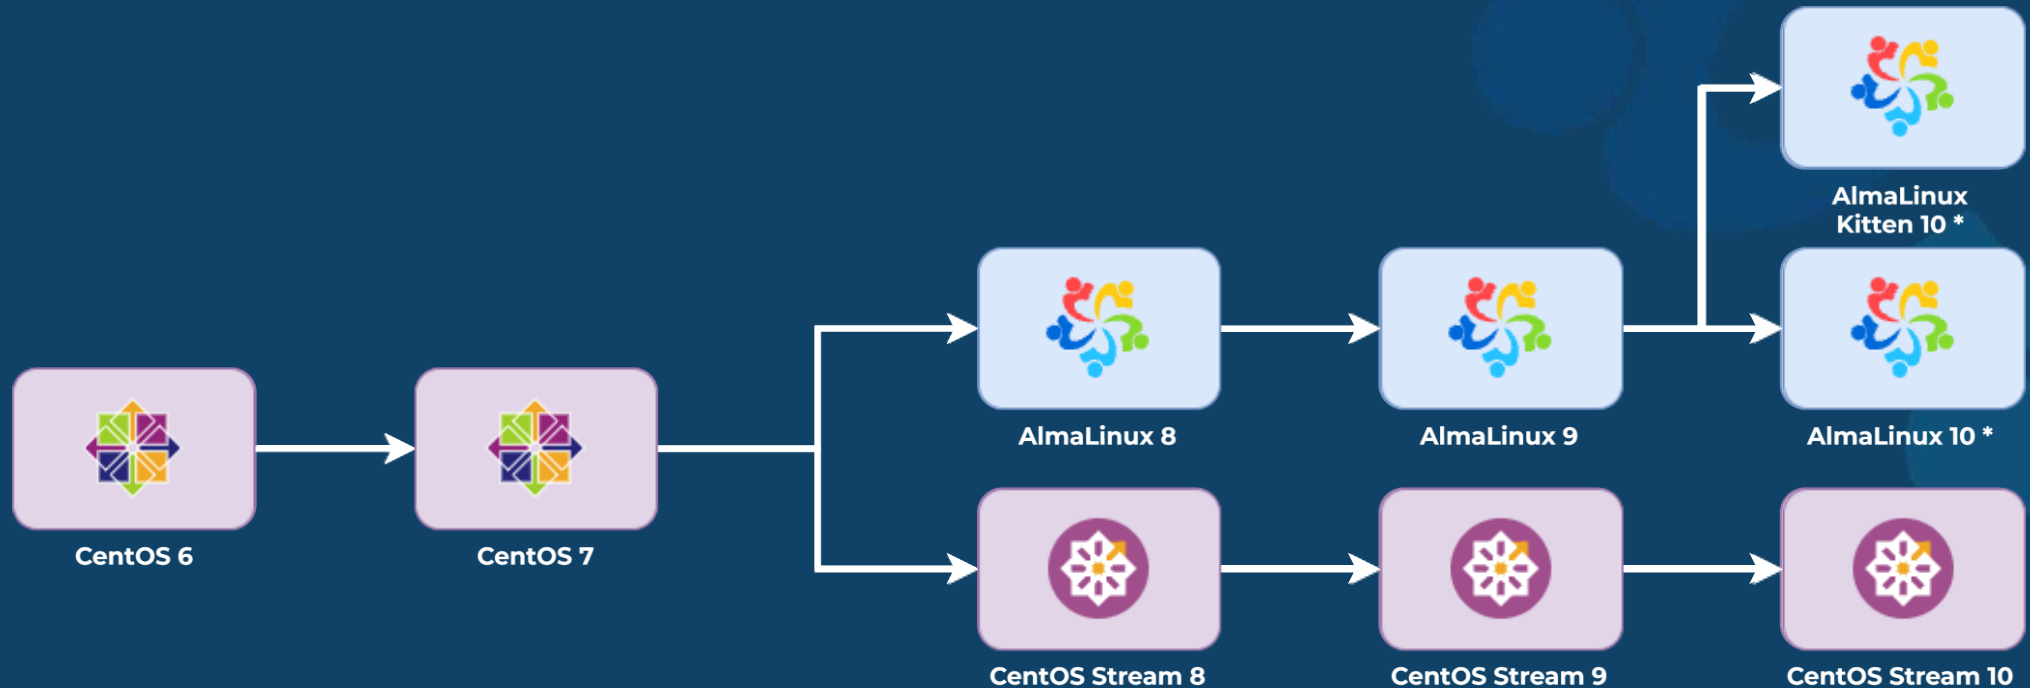

Raspberry Pi (aarch64)

RISC-V (RV64GC)

Migrations and upgrades got easier

ELevate now upgrades all the way to EL10.
Supported in upstream LEAPP since December 2025.

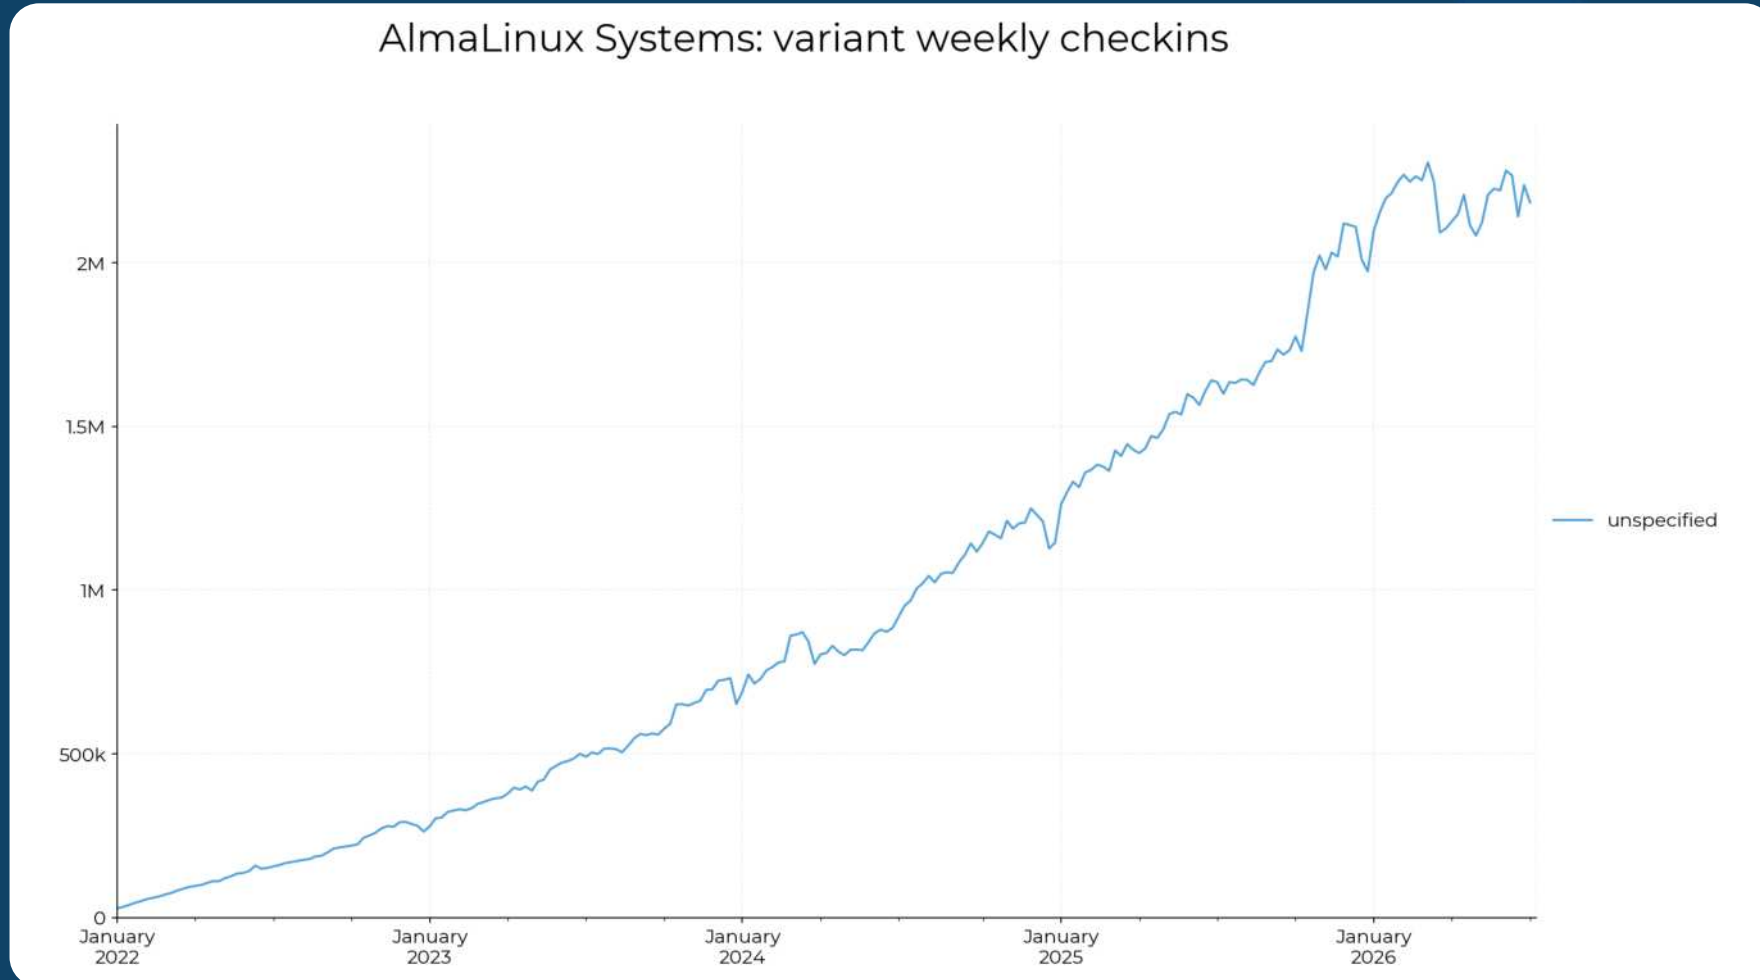

AlmaLinux OS Kitten

Shape it before it ships.

Where the community shapes the next release. Test it, break it, tell us, before it is set in stone.

Growing every week

By the numbers

2,400,000+

weekly update check-ins **~2x in a year**

500,000+

devices via ELevate

400+

mirrors (from ~100)

29

sponsor members

2

releases in one day

THE INDUSTRY'S CLOCK

VFX Reference Platform
moves to EL9 in
CY2027

X.org removed from
EL10

The display layer is
changing right now.

Forever-free. Community-owned.

PLATINUM

GOLD

KnownHost

Meta

SINE NOMINE
ASSOCIATES

RUBY

SILVER

BLACK HOST

Secure and compliant by default.

FIPS 140-3

9.2 validated, on the NIST Active list

Secure Boot

signed shim, cert valid through 2034

OpenSCAP + CIS

audit and hardening profiles built in

Signed packages

every RPM GPG-signed, verified by default

ALSA advisories

machine-readable OVAL and OSV data

SBOMs

generated by the build system for supply chain

Patched on our upstream's schedule, and ahead of it when the community needs it.

Born at SIGGRAPH.
Built by the industry.

Disney Animation

Cinesite

AWS Media &
Entertainment

SHED

plus founding contributors from NOX, Flying Bark, WeFX, and Velocity Limitless.

M&E is one of many.
A home for every workload.

to us today.

THE THROUGH LINE

- | The industry has to move this cycle.
- | AlmaLinux is doubling while it happens.
- | Standardize on the ground you own.

The floor is solid now.
